

## Environment, Health and Safety (EHS) Lead (m/f/d)

### Setting

At midge, we're reimagining the way healthcare systems work. You'll have the chance to be part of that change within a diverse and fast-growing team. We are creating the exciting opportunity for you to leave your footprint.

midge medical is developing diagnostic devices based on blood and other body fluids that are so easy to operate that they can be used by consumers as well as by professionals. The complete digitization of the testing procedure is at the core of our vision. You can contribute to our team as Environmental, Health and Safety (EHS) Lead and be at the center of all EHS activities.

### As EHS Lead, you will

ensure full compliance with national and international regulatory standards as well as building and maintaining midge guidelines in connection with EHS. You work with processes to establish annual EHS objectives and targets jointly with the quality organization.

- Provide direction and guidance to the leadership team and employees on EHS issues
- Continuously review EHS legislation to ensure midge policies and procedures are compliant
- Promote Environmental, Health and Safety awareness across the midge
- Monitor and report on midge EHS KPI's and goals
- Govern chemical management to all relevant processes
- Assist during third party certification body EHS audit, authorities audit and midge's EHS system evaluations
- Participate in the site's inspection and internal auditing programs
- Create EHS procedures and Standard Operating Procedures as applicable
- Be accountable for overall EHS risk assessment and monitoring plan
- Sponsor relevant Corrective and Preventive Action meeting and relevant activity
- Provide Adverse Events / Recall /Ads/Chemical assistance to all functional areas as well as Adverse Events & Recall reporting
- Ensure effective interaction at process level with operations team to effectively incorporate process activities into overall company strategies and EHS systems
- Be accountable for the overall EHS annual training plan
- Coordinate, organize, provide training and promote EHS orientation, Adverse Events, Recall etc.
- Assist in other activities and programs related with EHS, intranet etc.

### Must-Have Assets are

- Bachelor in scientific discipline like Engineering, Molecular Biology or Biochemistry
- 3+ years' experience in EHS system management role
- Strong data collection & exploration skills as well as excellent consultation skills
- Great proven skills in providing trainings and workshops
- Motivated person with a history of developing joint, cross-functional solutions

**Preferred**

- 2+ years ISO14001 lead auditor
- You have excellent written and spoken English and German language skills
- Working freely, excellent stakeholder management and organizational skills
- You already worked as part of teams following Agile Scrum methodology
- EHS certifications are desirable (i.e. REACH, Zero Harm etc.)
- Knowledge of applicable EU (ISO 13485) quality system requirements
- Auditor experience per ISO 13485 and/or FDA Quality System Inspection Techniques audits is considered a plus
- You worked on implementing a compliant supply chain
- Greenbelt certification or Lean experience
- Already used ERP software applications like SAP S4/Hana, Jira
- Travel required +/- 25%
