

Medical Technical Assistant (m/f/d)

Setting

At midge, we're reimagining the way healthcare systems work. You'll have the chance to be part of that change within a diverse and fast-growing team. We are creating the exciting opportunity for you to leave your footprint.

midge medical is developing diagnostic devices based on blood and other body fluids that are so easy to operate that they can be used by consumers as well as by health care professionals. The complete digitization of the testing procedure is at the core of our vision. We believe testing should be available, accessible and affordable to all. With our aim for ubiquitous testing, we will create a healthier world, reduce infections and take the pressure off public medical resources. You can contribute to our team as a Medical Technical Assistant and be at the center of all diagnostic testing activities.

As Medical Technical Assistant, you will

- Work closely with an international expert team of biochemists and diagnostics experts
- Be part of a small dynamic team that combines start-up spirit with highly professional medical expertise
- Be accountable for organizing and conducting tests and handling of samples
- Play a main role in developing new disruptive diagnostic procedures
- Calibrate and maintain measurement instruments
- Conduct common laboratory analytical and preparatory procedures

Must-Have Assets are

- Successful graduation as MTA (Medizinisch Technische/r Assistant/in)
- 5 years of experience with laboratory practices, lab operations
- Experience with genetic testing / real time-PCR testing
- Fluency in German and English (spoken and written)

Preferred

- Interest in contributing to fast-moving innovative medical devices research and development
- Able to conduct routine equipment maintenance
- You worked in the pharmaceutical, chemical or biotech industry
