

Senior Software Engineer (m/f/d/x)

At midge, we're reimagining the way healthcare systems work. You'll have the chance to be part of that change within a diverse and fast-growing team. We are creating the exciting opportunity for you to leave your footprint.

midge medical is developing diagnostic devices based on blood and other body fluids that are so easy to operate that they can be used by consumers as well as by health care professionals. The complete digitization of the testing procedure is at the core of our vision. We believe testing should be available, accessible and affordable to all. With our aim for ubiquitous testing, we will create a healthier world, reduce infections and take the pressure off public medical resources.

You can contribute to our team as a Senior Software Engineer and be at the center of our product and infrastructure development.

As a Software Engineer at midge medical, you will:

- Work as a part of a cross-functional team with end-to-end product development ownership
- Architect, develop, test, release, monitor, maintain, and improve software
- Manage individual project priorities, deadlines and deliverables

Required qualifications:

- Software development experience in one or more general-purpose programming languages including but not limited to Python, Java, Go, Kotlin, C/C++, JavaScript
- Interest and ability to further develop your skills and learn on the job
- Working proficiency and communication skills in verbal and written English

Preferred qualifications:

- Experience building scalable and reliable distributed systems in a cloud environment (we use Amazon Web Services and rely on Kubernetes)
- Experience with Python and its ecosystem (we use Django)
- Experience with developing software for medical devices or with healthcare industry in general

Place of work:

Berlin, Germany

When can you start?

As soon as we have agreed that we are a match!
